2026-09-25 07:27:44	NarrativeSection.AiDrafted	system/AI	After: text=The proposed business change involves onboarding QuickPay Processing Ltd, a vendor based in Malta, to serve as a card settlement processor. As part of this engagement, QuickPay Processing Ltd will receive sensitive cardholder personally identifiable information (PII) and settlement files via an API, necessitating rigorous oversight of the customer and entity risk associated with this arrangement. According to the FFIEC BSA/AML Manual, certain categories of customers and entities pose an elevated risk of money laundering, including those identified by geographic and sectoral risk factors (Risks Associated with Money Laundering and Terrorist Financing - Customers). Given QuickPay Processing Ltd's jurisdiction in Malta, it's imperative to factor in applicable country risk considerations as part of the risk-based customer due diligence program. The bank's risk-based customer due diligence framework mandates scaling the level of scrutiny depending on the customer's risk profile. In this case, the collection of cardholder PII and settlement files expands the potential exposure to financial crime risks, necessitating commensurate due diligence measures on the vendor's anti-money laundering (AML)

			controls and legal/regulatory compliance in its operating jurisdiction. Although Malta is not explicitly cited within the policy excerpt as a higher-risk jurisdiction, geographic risk is a recognized factor in scaling due diligence scrutiny. Therefore, due diligence activities should focus on evaluating the vendor's AML controls to mitigate potential money laundering and terrorist financing risks associated with the vendor relationship., riskCategoryId=22222222-2222-2222-2222-222222222222
2026-09-25 07:27:48	NarrativeSection.AiDrafted	system/AI	After: text=The proposed business change involves onboarding QuickPay Processing Ltd., a Malta-based vendor, as a card settlement processor. The vendor will receive cardholder personally identifiable information (PII) and settlement files via an API. According to the FFIEC BSA/AML Manual section on Risks Associated with Money Laundering and Terrorist Financing regarding Delivery Channels, reliance on third-party agents and correspondent relationships to deliver products inherently increases risk due to the reduced ability of the bank to directly verify customer identity and intent. This reduction in direct verification capability necessitates a thorough risk assessment specific to the implications of using QuickPay Processing Ltd. as a settlement vendor.
			Given that the vendor operates in a non-face-to-face, third-party capacity and will have access to sensitive cardholder data, it is critical that the bank's overall risk assessment explicitly addresses the risks introduced by the delivery channel change. This includes heightened consideration of identity validation challenges and potential vulnerabilities introduced by cross-jurisdictional operations with Malta. These risk factors must be carefully managed and mitigated in line with the guidance outlined in the FFIEC manual to ensure compliance and minimize exposure to financial crimes associated with delivery channels., riskCategoryId=22222222-2222-2222-2222-222222222224
2026-09-25 07:27:52	NarrativeSection.AiDrafted	system/AI	After: text=The proposed onboarding of QuickPay Processing Ltd, a vendor based in Malta, as a card settlement processor introduces geographic risk considerations as delineated in the FFIEC BSA/AML Manual. Geographic risk assessment focuses on exposure to jurisdictions identified by FATF for strategic AML/CFT deficiencies, jurisdictions under OFAC sanctions, and domestic High Intensity Financial Crime Areas (HIFCAs). While Malta is the vendor's jurisdiction, it is essential to evaluate its standing relative to these critical risk indicators to determine the appropriate level of scrutiny. The vendor will handle sensitive cardholder personally identifiable information (PII) and settlement files via API, which heightens the importance of assessing the AML/CFT risks associated with their geographic location. Given that the policy mandates additional scrutiny for products, customers, and transactions connected to higher-risk jurisdictions, this vendor relationship warrants a thorough due diligence process to identify and mitigate such risks effectively (Risks Associated with Money Laundering and Terrorist Financing - Geographic Locations), riskCategoryId=22222222-2222-2222-2222-222222222223
2026-09-25 07:28:06	NarrativeSection.AnalystEdited	Amara Chen	Reason: Added EDD requirement and tightened wording (QA) After: text=QA analyst narrative: onboarding a Malta-domiciled settlement processor with API access to cardholder PII. EDD and annual audit rights required., riskCategoryId=22222222-2222-2222-2222-222222222222 Before: id=4d76c74f-0c7c-425c-8ee9-02323e60af93, status=AiDrafted, updated_at=2026-09-25T07:27:44.278135+00:00, assessment_id=a46d7e97-e303-4945-bf55-5ff7405b2a25, narrative_text=The proposed business change involves onboarding QuickPay Processing Ltd, a vendor based in Malta, to serve as a card settlement processor.
